

PPT Remote

V0.1

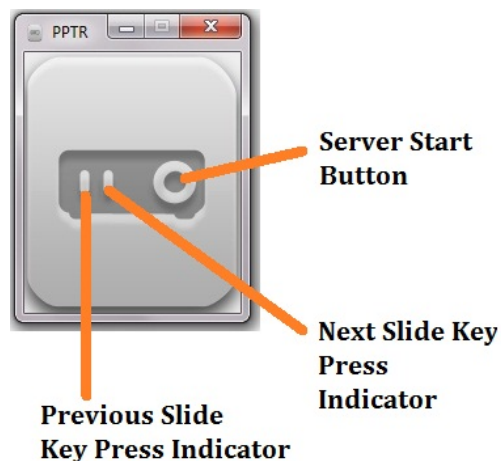

User Manual

PPT Remote is a mobile based presentation controller/ remote.

Before starting the presentation, start the PPTRemote server application in your desktop or laptop. Then start the server by clicking on to the start server button

Now start the PPTRemote client application from your mobile and select search and connect if you are using the application for the first time or select last used if already connected to a server.

Now go to slide show mode then press 2 on your mobile to go to the next slide and press 5 for previous slide.
